

BLUE DYE

Concentrated Dye For Ponds & Water Gardens

- Shades Pond From Harmful UV Rays
- Conceals Fish From Predatory Birds
- Concentrated, Easy To Use Formula
- Safe For All Fish, Plants And Wildlife

Fritz Pond Blue Dye turns pond water a beautiful, vibrant blue. Blue water also helps to conceal fish from predatory birds and wildlife such as raccoons. Fritz Pond Blue Dye is compatible with FritzZyme® biological products and all other Fritz Pond conditioners and clarifiers.

Dosage / Instructions:

Add 1 cap (1 tsp/5 ml) per 40 U.S. gallons (151 L). Use a bucket or container to take one gallon of water from pond. Shake product well and add 1 capful (5 ml) per 40 gallons of pond capacity to bucket. Gently stir and pour this mixture into pond around the edge. Wait for the blue colorant to disperse. Treat again if a darker coloration is desired. When color fades over time, re-treat. NOTE: This product may stain porous surfaces, concrete and water features.
