

PLATINUM DC SLIM WAVE PUMPS

Models range from 1600-8000gph

- Sine wave technology, super quiet <20dB
- DC voltage
- Durable, corrosion resistant
- High flow rates, no attenuation
- High performance, compact size

Distributed exclusively in the USA
by Sevenports LLC

- Controllable
- 5-year warranty on the pump
- 3-year warranty on the adapter
- Price protected
- Sold only to select dealers
- Warrantied by Sevenports
- Serviced by Sevenports
- Reasonably priced

- High flow DC controllable water circulation pump suitable for both salt and freshwater aquariums
- Compact design allows the Platinum DC Slim to be used and easily hidden in tanks where space is limited
- Fully controllable and adjustable (using the supplied controller) with pre-set wave patterns
- Multiple time setting periods enable current settings to be programmed to replicate the natural movement found in nature
- Push button “feed timer” slows the water flow for 10 minutes to allow fish to feed
- Versatile adjustable mounting using a strong magnet with anti-vibration rubber pads for quiet operation.
- Ceramic shaft propeller offers maximum performance and efficiency
- Suitable for aquariums up to 15mm or .59 inches thick
- Low voltage - 24v (Slim 1600 is 12V) for safety and controllability

Specifications

Model	Slim 1600	Slim 2600	Slim 5200	Slim 8000
Flow Rate	1579gph	2642gph	5263gph	7894gph
Max Power Consumption	14W	20W	40W	70W
Min Power Consumption	3W	6W	6W	10W
Voltage	DC 12V	DC 24V	DC 24V	DC 24V
Dimensions	1.9"x 1.9"x 2.1"	2.4"x 2.4"x 2.6"	2.9"x 2.9"x 2.9"	4.0"x 4.0"x 3.7"
